BACKGROUNDS, LIGHTING & WEATHER

Backgrounds and lighting are an integral component to any great photo, especially conformation photos. A poor background can ruin an otherwise fabulous image. For conformation photos, we prefer the background to be free of distraction, and as far away from the subject as possible. Ideally, the terrain will allow the horse to slightly elevated in relation to the camera.

Afternoon shoots: background will be to the East or Northeast. Shooting timelines depend on time of year.

Morning shoots: background will be to the West or Northwest. Shooting timelines depend on time of year.

Weather: ideally, we need full sun or <30% cloud cover, and less than 10mph wind speed. Temperature doesn't matter.
